Mathematics (MA)

3 meetings in a cycle (AM)

Mathematics for XCE Yunnan will make use of the concepts they have learned in class to explore their surroundings. It is a merging of mathematical ideas and appreciation for God’s creation.
Discerning the Sacred & Moral Reflection (DSC)

2 meetings in a cycle (AM)

This course aims to bring the students to an understanding and practice of moral reflection and discernment. In XCE, they will be exposed to a setting that will give them the opportunity to practice moral reflection and discernment in decision-making. In a lot of instances during their XCE experience, they will be compelled to make decisions for themselves and for those who are with them in the trip – decisions that are hopefully results of moral reflection and discernment.
Culture and Ethnic Identities (CE)

2 meetings in a cycle (AM)

The Culture and Ethnic Identities course is about revisiting the definition of culture within the contexts of the conflicts and changes brought about by globalization.
Culture and the Senses in English is about taking in the experience, making of the experience, and sharing the experience.

2 meetings in a cycle (AM)
Culture and the Senses, Filipino (CSF)

Ecology and Biodiversity focuses mainly on the interaction of physical and biological factors and how they shape an ecosystem. Specifically, it tackles the following aspects:
- Weather, soil and water
- Species interaction and population
- Impact of human actions to the environment
Music (MU)

This course aims to help our students understand and explore how the diverse musical traditions of Asia are shaped by radically different religious beliefs and social norms and by demonstrating how various Asian cultures can be understood through their musical traditions.
Wushu (WU)  
**every Saturday (PM)**  
- Focuses on stretching, balance, and controlled body movement  
- Allows students to engage in a unique form of exercise while learning a cultural tradition
Assessments are designed to make the most of the experience. Non-negotiables are identified and synergy among the courses are highlighted to maximize the time spent in the trip.
